

Zenaian Public Legal Documents - Final Pre-Implementation Draft

Website Privacy Policy + Website Terms of Service + Whop Checkout Additional Terms + Return/Withdrawal Policy

Final pre-implementation version 1.0 | August 14, 2026 | Repository snapshot d9137c605755

Final pre-implementation compliance specification. Operator/CPO placeholders remain for manual completion. Re-check Korean law in force on the actual launch date before publication.

Publication status

Replace bracketed operator/CPO/support-registration placeholders before publication. Hosting.kr and Whop roles have been resolved on the best public evidence available. Complete implementation and perform the launch-date Korean-law check before publishing.

DOCUMENT A - ZENAIAN PRIVACY POLICY

Effective: [EFFECTIVE DATE] | Last updated: August 14, 2026

1. Who we are and scope

Zenaian is operated by [LEGAL OPERATOR NAME], [LEGAL FORM], Republic of Korea, with address [KOREAN BUSINESS ADDRESS]. Privacy contact: privacy@zenaian.com. Privacy responsible person / CPO: [NAME / TITLE / CONTACT].

This Privacy Policy applies to www.zenaian.com, the Zenaian Chrome extension, the Zenaian API, account and subscription functions, and privacy-support communications. Zenaian is designed and operated from Korea and uses the Personal Information Protection Act of Korea ("PIPA") as its primary privacy baseline.

Zenaian does not use third-party behavioral analytics, cross-site advertising trackers, advertising profiles or sale of personal information. The public website is offered in English; the service does not intentionally target a particular foreign region.

2. Personal information we process

- Account information: Clerk user identifier, email address, name/display name, sign-in/account-security information and session state needed for authentication.
- Extension information: local custom instruction/preferences, local rotating device credentials, and server-side pairing/device-session identifiers and timestamps.
- Question content: only when you deliberately activate a capture, the visible screenshot or selected screen region and an optional instruction are processed to generate an answer.
- Usage information: plan, quota period, usage counts, operation identifiers, model identifier, status and limited timestamps needed to enforce allowances and prevent duplicate charging/usage.
- Subscription information: Whop checkout, membership, product/plan, renewal/cancellation, payment/refund/dispute identifiers and minimum payment-state information needed to grant access, support transactions and comply with law. Zenaian does not store full payment-card numbers.
- Operational/security information: request identifier, request method/path/status, safe error codes, timing and limited security events. We do not intentionally put screenshots, prompts, answers or authentication tokens in application logs.
- Privacy/support information: information you choose to include when contacting privacy@zenaian.com and minimal records showing how a privacy request or consumer complaint was handled.

3. Legal bases under Korean PIPA

The following quotations are Zenaian's working English translations of the relevant Korean statutory clauses for user readability. The Korean statutory text controls.

- PIPA Article 15(1)(4) permits processing where it is "necessary to perform a contract concluded with the data subject, or to take measures requested by the data subject in the process of concluding a contract." Zenaian relies on this for account/authentication, requested screenshot analysis, usage allowances, subscription access and ordinary account support.
- PIPA Article 15(1)(6) permits processing where it is "necessary to achieve the controller's legitimate interests and those interests clearly take precedence over the data subject's rights," provided the interest is substantially related and the processing remains within a reasonable scope. Zenaian relies on this narrowly for security, rate limiting, replay prevention, fraud/abuse prevention and short diagnostics.
- PIPA Article 15(1)(2) permits processing "where there is a special statutory provision, or processing is unavoidable in order to comply with a legal obligation." Zenaian relies on this for transaction/complaint records that Korean law requires us to preserve and for other concrete legal duties.
- PIPA Article 21 requires personal information to be destroyed without delay when it becomes unnecessary because its retention period has expired or its purpose has been achieved. When another law requires continued retention, Article 21 requires that retained information be stored and managed separately. Zenaian therefore separates legally retained transaction records from ordinary live account data.
- PIPA Article 23 generally restricts processing of sensitive personal information unless a specific statutory exception applies. Zenaian is not designed to collect sensitive personal information and prohibits intentional submission of identifiable sensitive personal information in captures or instructions.
- PIPA Article 28-8 governs overseas provision, processing outsourcing and storage. Where overseas outsourcing/storage is necessary to perform the service, Zenaian uses the contract-performance route in Article 28-8(1)(3) and publishes the prescribed transfer information below.

4. Screenshot processing, sensitive information and xAI ZDR

Zenaian captures screen content only after you deliberately invoke a configured capture action. It is not designed to continuously record your screen, collect browsing history, or build a history of questions you view.

The captured image and optional instruction are transmitted over encrypted connections to the Zenaian API in Virginia, United States, and then to xAI for the requested generative-AI inference. Zenaian does not save the screenshot, instruction, question text or AI answer as a persistent application database record. The server clears the sensitive request body after completion, cancellation or timeout, and completed result state is retained only briefly for polling.

Our production xAI team is configured for Zero Data Retention (ZDR). xAI states that ZDR User Content is processed transiently and not retained as a durable content copy after processing under its current enterprise terms. Zenaian also verifies the xAI ZDR response header in production and is designed not to fall back to ordinary-retention inference if ZDR is not confirmed.

Do not intentionally submit identifiable sensitive personal information, such as an identifiable person's medical/health record, political or religious information, sexual-life information, biometric/unique identifiers, authentication secrets, financial credentials, or other highly sensitive material. If such material is accidentally included, Zenaian's design is to process it only transiently through the requested ZDR inference path rather than create a persistent profile or history.

5. Why we use information

- create, authenticate, secure and support your account;
- pair and authenticate the extension;
- perform the screenshot analysis you request and return the answer;
- administer plan limits and prevent duplicate usage;
- create and reconcile subscriptions, payments, renewal cancellation, refunds and disputes;
- prevent abuse, secure the service and diagnose failures using minimized operational information;
- respond to privacy/consumer requests; and
- comply with transaction-retention, accounting, tax, consumer-protection and other legal duties.

6. Service providers and international processing

Zenaian uses service providers only for defined operational purposes. We do not sell captured content or personal information. Overseas transfer details are as follows:

Recipient	Country/location	Information	Purpose	Timing/method	Retention
Render Services, Inc.	United States - Virginia	Account identifiers, extension-session/usage/billing metadata; transient screenshot/instruction in server RAM	API and PostgreSQL hosting, security and recovery	At service requests / continuous hosting over encrypted connections	Zenaian schedule; native logs up to 30 days depending plan; database recovery copies roll for the provider plan window.
Clerk, Inc.	United States; Clerk/subprocessors may process where they operate	Email/name/account identifiers, authentication/session/security information	Authentication and account management	Signup/login/session/account operations	Account lifetime and provider security/legal lifecycle; Zenaian initiates Clerk user deletion when account deletion completes.
X.AI LLC	United States; xAI public subprocessor list is mainly US and includes a UK support subsidiary	Transient screenshot, instruction/prompt and generated result; incidental ordinary personal information may appear	Generative-AI inference	Each deliberate capture over encrypted API	Zero Data Retention for User Content in production.
Whop, Inc. and payment/tax partners	United States and other locations used by Whop/partners	Whop directly collects buyer/payment/tax data at checkout. Zenaian sends provider-native checkout/membership/payment identifiers and subscription commands, and receives minimum transaction/access state. Whop may also share limited purchase/contact/profile information with Zenaian as seller under its own data-sharing/privacy terms.	Checkout, recurring billing, tax handling where supported, refunds/disputes	At checkout and subscription lifecycle	Provider/legal retention. Zenaian retains only the minimized operational and statutory records described here.
Google Workspace / Google LLC	[PLANNED CONFIGURATION: United States for covered data at rest; service/support processing may occur in countries on Google's current subprocessor list]	Privacy/support emails you choose to send	Privacy/support communications	When you email privacy@zenaian.com	Ordinary closed privacy email target: 365 days; minimized statutory complaint record separately where required.

Domestic website hosting: www.zenaian.com is hosted through Hosting.kr / Megazone Co., Ltd. in the Republic of Korea. Hosting.kr describes its Linux hosting as AWS-based. On the current evidence, Zenaian treats this as domestic entrusted processing rather than a Zenaian overseas transfer. The host receives ordinary website requests and provider-native access/security logs; Zenaian does not place its account database, screenshot analysis data or behavioral analytics on the website host. Visitor-statistics packages and raw-log archiving are disabled by Zenaian by default.

For the overseas processors above, Zenaian relies on PIPA Article 28-8(1)(3) where the processing outsourcing or storage is necessary to conclude or perform our service contract and the information required by Article 28-8(2) is published here. If you choose not to use the overseas processing required for account authentication, API hosting or AI inference, we cannot provide the corresponding core service. You may avoid further capture processing at any time by not invoking a capture and may delete your account as described below.

7. Whop checkout and taxes

Paid subscriptions are checked out through Whop. The product uses exclusive tax behavior: the product price is shown before tax and Whop may add applicable sales tax or VAT at checkout based on the transaction. Zenaian has selected Whop's Collects and Remits mode for supported jurisdictions. Whop's current Seller Terms state that Whop's merchant-of-record role is limited to payment/card-network settlement and, in Collects and Remits jurisdictions, specified transaction taxes; Zenaian remains the supplier responsible for the product, consumer obligations and taxes outside the scope Whop actually handles. Whop's Seller Terms also incorporate a Seller Data Sharing Addendum governing

personal-data sharing between Whop and sellers. Whop's Privacy Policy states that it may share purchase confirmation, username, contact and certain account-profile information with the relevant seller to complete a purchase.

For new production checkouts, Zenaian is designed to send no Zenaian user-identifying custom metadata to Whop. Whop collects buyer/payment information directly under its own terms and may share limited purchase/contact/profile information with Zenaian as the seller where necessary to complete the purchase. Zenaian maps provider events using Whop's checkout_configuration_id and other provider-native checkout/membership/payment identifiers, and stores only the fields reasonably necessary for service access, support and legal records. Whop may independently retain its buyer/payment/tax records according to its own legal obligations; Zenaian account deletion cannot erase records Whop independently must keep.

8. Retention

Category	Retention
Screenshot / instruction	No persistent application storage; transient until completion/cancel/timeout.
AI answer/result job	Brief polling window, normally about 2 minutes after completion.
Pairing grants	Minutes; expired/consumed cleanup normally within about 1 hour.
Extension device session	Active credential lifetime (currently up to 30 days) plus short ordinary cleanup; deleted immediately on account deletion.
Per-analysis quota operation	30 days after settlement.
Usage-period summary	90 days after the period ends.
Failed/expired checkout	7 days; consumed checkout operational record 30 days.
Sanitized Whop webhook/provider event	30 days.
Terminal live membership	Up to 90 days where needed for reconciliation; deleted sooner on account deletion.
Live user-facing payment history	Up to 12 months while the account exists; legally required transaction copy is separately archived.
Render logs	Provider-native 7/14/30-day retention depending workspace plan; Zenaian does not stream launch logs to a third-party log warehouse.
Legally required contract/withdrawal records	5 years where the Korean E-Commerce Act applies.
Legally required payment/supply records	5 years where the Korean E-Commerce Act applies.
Consumer complaint/dispute records	3 years where the Korean E-Commerce Act applies.
Privacy-request audit	1 year after completion, unless an actual dispute/legal duty requires longer.
Ordinary privacy mailbox message	Target 365 days after receipt; legally required complaint facts are minimized and stored separately.

Korean e-commerce rules also require certain advertising records to be preserved for six months. Zenaian can satisfy this through versioned offer/pricing records without attaching them to individual users.

9. Account deletion

You can request account deletion from the authenticated account page. Before deletion, we require explicit confirmations explaining its consequences. Once confirmed, Zenaian immediately blocks further service use, cancels in-flight analysis where possible, revokes extension sessions, removes your Zenaian entitlement, requests cancellation of future Whop renewal, separates any transaction information that must be preserved by law, deletes ordinary Zenaian account/usage/billing records, and deletes the Clerk user account.

Our engineering target is to initiate deletion immediately and normally complete deletion from active systems under Zenaian's control within 24 hours. This target does not mean every provider recovery copy or legally required record is physically erased within 24 hours. Narrow statutory records remain isolated until their legal retention period expires, and rolling provider recovery copies age out according to the provider's recovery schedule. If a database recovery copy is restored, Zenaian reapplies completed deletion records before reopening the restored system to production.

Account deletion ends remaining Zenaian access and unused question allowance immediately. It requests cancellation of future renewal but is not itself a request for a refund and does not waive any mandatory withdrawal/refund right you have under applicable law.

10. Your rights and requests

Subject to applicable law, you may request access, correction, deletion, suspension of processing/withdrawal where applicable, and information about processing under Zenaian's control. The account page provides a human-readable privacy view and JSON export, plus account deletion. You may also contact privacy@zenaian.com.

We use proportionate identity verification. Normally, an authenticated account is sufficient. We do not ask for a passport or government ID merely because you make a privacy request. Where deletion or correction is restricted by a specific legal retention duty, we will explain the basis and continue to isolate the retained record from ordinary service use.

11. Security and incident handling

Zenaian uses encrypted connections, production authentication, exact-origin controls, rotating extension credentials, server-authoritative quotas, signed billing webhooks, bounded request sizes/timeouts, database access controls and data minimization. No online service can guarantee absolute security.

If a qualifying personal-information leak occurs, Zenaian follows the notice/reporting duties under Korean law, including the current 72-hour rules where applicable.

12. Age

Zenaian is available only to users who are at least 19 years old. We do not intentionally offer accounts or paid subscriptions to persons under 19. If we learn that an under-19 person created an account contrary to this requirement, we may suspend/delete it and handle any legally required consumer/privacy steps.

13. Changes and contact

We may update this policy when the service, providers, law or data practices change. Material changes will be identified by a revised date and any notice/consent required by law. Contact: privacy@zenaian.com. Operator: [LEGAL OPERATOR NAME / ADDRESS / BUSINESS REGISTRATION]. Privacy responsible person: [CPO DETAILS].

DOCUMENT B - ZENAIAN TERMS OF SERVICE

Effective: [EFFECTIVE DATE] | Last updated: August 14, 2026

1. Agreement and eligibility

These Terms govern your use of Zenaian, including www.zenaian.com, the Chrome extension, AI analysis, accounts and subscriptions. By creating an account, installing/using the extension or purchasing a plan, you agree to these Terms and the Privacy Policy. You must be at least 19 years old and legally able to enter this agreement.

2. Service and generative-AI notice

Zenaian uses generative artificial intelligence, including xAI Grok models, to analyze a user-initiated screenshot of a multiple-choice question and generate a proposed answer. This is advance notice that the service is operated using generative AI. While an answer result is displayed, the Chrome extension identifies it through the extension action hover text, for example "AI-generated answer: B" or "AI-generated answers: A, C"; inconclusive results are identified as AI-generated as well.

AI output can be inaccurate, incomplete, outdated or unsuitable. You are responsible for deciding whether and how to use it. Zenaian is not professional legal, medical, financial, safety-critical, academic-authority or certification advice and does not guarantee answer accuracy, availability, response time or continued access to a particular model.

3. Acceptable use

- Do not use Zenaian for cheating or in any exam, quiz, assignment, certification, competition, interview or other assessment where AI/outside assistance is prohibited, restricted, undisclosed or not authorized.

- Do not bypass proctoring, monitoring, paywalls, security measures, access controls, rate limits, quotas or payment restrictions.
- Do not impersonate others, submit stolen assessment material, gain unauthorized access, commit fraud, or use the service unlawfully.
- Do not intentionally submit identifiable sensitive personal information, authentication secrets, financial credentials, or content you are not authorized to process.
- Do not resell, share or automate abusive use of accounts/subscriptions, reverse engineer except where mandatory law permits, or disrupt the service.

4. Plans and usage allowances

Plan descriptions, model availability and question allowances shown in the account/pricing interface at purchase are the current commercial terms for the plan. Unused allowance expires at the applicable reset/paid period, has no cash value and is not transferable. Rate limits and abuse controls are separate from subscription allowance.

5. Billing, taxes and automatic renewal

Paid subscriptions are purchased through Whop. [LEGAL OPERATOR NAME] is the supplier of Zenaian. Whop provides payment services and acts in the limited merchant-of-record/tax capacities described in its then-current terms. Whop Buyer Terms also apply to your purchase.

Subscriptions renew automatically at the billing interval shown at checkout until canceled. The product uses exclusive tax behavior, so applicable sales tax/VAT may be added on top of the displayed product price. Whop collects and remits supported transaction taxes where its service applies. The final amount, tax and renewal terms are shown at checkout before purchase.

6. Cancellation

You may cancel future renewal from the Zenaian account interface when the subscription is eligible for cancellation. Ordinary cancellation stops future renewal and normally leaves already-paid Zenaian access through the current paid period. Account deletion is different: it immediately ends Zenaian access and unused allowance and requests cancellation of future renewal.

7. Refunds and statutory withdrawal rights

Except where mandatory law, a confirmed duplicate/processing error, binding payment-network rule, or an express Zenaian offer requires otherwise, Zenaian does not voluntarily provide prorated refunds or cash credits merely because some subscription time or question allowance was unused.

This rule does not limit non-waivable consumer rights. For Korean consumers, the E-Commerce Act generally provides a statutory withdrawal period under Article 17, subject to its statutory exceptions and required disclosures/measures. Where provision of a service or digital content has begun, a withdrawal limitation applies only to the extent the statutory conditions are satisfied; for divisible services/content, rights may remain for an unprovided portion. If the service differs from its advertisement or contract, the separate Article 17(3) remedy applies. Where a valid withdrawal/refund applies, Zenaian will process it within the period required by Article 18 and other mandatory law.

Deleting your Zenaian account is not a waiver of a valid statutory withdrawal/refund right. A refund/withdrawal request should be made through the channel shown at checkout/account or privacy@zenaian.com so it can be assessed independently of account deletion.

8. Account deletion

If you choose Delete Account and complete the required confirmations, your Zenaian access and unused allowance end immediately. Zenaian will revoke active service sessions, request cancellation of future renewal, delete ordinary account/service information, and retain only records that law requires us to preserve or narrow data temporarily required to complete the deletion/provider retry. Legally required records remain isolated until their statutory period expires.

9. Your content and privacy

You retain rights you have in content you submit. You represent that you are authorized to capture and process it. You grant Zenaian and its service providers a limited license to transmit and process the submitted content only as necessary

to provide, secure and lawfully operate the requested service. The Privacy Policy explains the transient screenshot architecture and xAI ZDR.

10. Intellectual property

Zenaian software, branding, interface and documentation are protected by applicable intellectual-property law. Subject to these Terms, Zenaian grants you a limited, personal, non-exclusive, non-transferable and revocable right to use the service for its intended purpose. No ownership is transferred.

11. Suspension and termination

Zenaian may limit, suspend or terminate access where reasonably necessary for security, provider requirements, payment risk, legal compliance, or enforcement of these Terms. Serious or repeated cheating, fraud, security abuse, account sharing, automated abuse or billing/quota circumvention may result in immediate termination. Mandatory consumer rights are not excluded.

12. Third-party services

Zenaian depends on Clerk, Render, xAI, Whop, Google Chrome and related infrastructure. Those services operate under their own terms and can experience outages or changes outside Zenaian's control. Zenaian is independent and is not endorsed by those providers.

13. Disclaimers and liability

To the maximum extent permitted by law, Zenaian is provided "as is" and "as available." Mandatory warranties and remedies that cannot lawfully be excluded remain unaffected. To the maximum extent permitted by law, Zenaian is not liable for indirect, incidental, special or consequential loss, loss of opportunity/revenue, academic/employment/certification consequences, or decisions made in reliance on AI output. Where liability cannot be excluded, any contractual liability cap applies only to the extent lawful and does not limit mandatory consumer remedies.

14. Governing law and disputes

These Terms are governed by the laws of the Republic of Korea, without depriving a consumer of mandatory protections that applicable law does not permit the parties to waive. Jurisdiction and venue will be determined by applicable procedural/consumer law unless [LEGAL OPERATOR NAME] later publishes a lawful agreed forum clause reviewed for the target launch.

15. Changes and contact

We may update these Terms prospectively. Material changes receive a revised date and any notice/acceptance required by law. Contact: [SUPPORT EMAIL] and privacy@zenaian.com. Operator details: [LEGAL OPERATOR NAME / ADDRESS / REGISTRATION].

DOCUMENT C - ZENAIAN WHOP CHECKOUT ADDITIONAL TERMS

These Additional Terms apply to a Zenaian subscription purchased through Whop. They supplement, and do not replace, the Zenaian Website Terms of Service, Zenaian Privacy Policy, the exact plan/price/renewal information shown at checkout, and applicable Whop Buyer Terms. If mandatory law provides a right that conflicts with these Additional Terms, mandatory law controls.

1. Supplier and eligibility

Supplier: [LEGAL OPERATOR NAME], Republic of Korea. You must be at least 19 years old to purchase or use Zenaian.

2. Product and AI disclosure

Zenaian is a subscription software service that uses generative AI, including xAI Grok, to generate proposed answers to user-initiated screenshot captures. AI output is not guaranteed to be correct. The service is for lawful, authorized use only and may not be used for prohibited cheating or assessment circumvention.

3. Price, tax and renewal

The base subscription price and billing interval are shown at checkout. Tax behavior is exclusive: applicable sales tax/VAT may be added on top based on the transaction. Whop is configured to collect and remit supported transaction taxes where available under its Tax Service. The final amount is shown before you submit payment. The subscription renews automatically at the interval shown until canceled.

4. Delivery and allowance

Digital access begins after successful payment/entitlement confirmation. The plan's question allowance, reset/period end and model availability are shown in Zenaian. Unused allowance does not roll over or have cash value unless mandatory law requires otherwise.

5. Cancellation

Normal cancellation stops future renewal and ordinarily keeps already-paid access until period end. Account deletion is an immediate service termination: Zenaian access and unused allowance end immediately, and Zenaian requests cancellation of future renewal.

6. Return / withdrawal / refund policy

Zenaian does not ordinarily provide discretionary prorated refunds for unused subscription time or unused questions. This does not limit mandatory consumer rights. Korean consumers may have statutory withdrawal rights under the E-Commerce Act Article 17. Any limitation based on immediate commencement of a service/digital-content supply applies only if the statutory exception and required disclosures/measures are satisfied. For a valid withdrawal, refunds are processed within the legally required period, including Article 18's three-business-day rule where applicable. Different/non-conforming supply is handled under the separate statutory remedy. Contact [SUPPORT EMAIL] or privacy@zenaian.com for a statutory withdrawal/refund request.

7. Account deletion is not a refund request

Deleting a Zenaian account immediately ends access and unused allowance and requests future-renewal cancellation. It does not automatically create a refund and does not waive a valid mandatory withdrawal/refund right.

8. Privacy

Zenaian does not intentionally store screenshot/question/answer history. Production AI inference uses xAI Zero Data Retention. Do not intentionally submit identifiable sensitive personal information. Whop separately processes buyer/payment/tax information under its privacy notice and its Seller Terms incorporate a Seller Data Sharing Addendum governing Whop-Seller data sharing. See the Zenaian Privacy Policy for account, retention, international transfer and deletion details.

9. Agreement at checkout

Before production sales, Zenaian will upload the applicable Privacy Policy, Terms of Service and Return Policy / these Additional Terms in Whop's legal settings and enable Whop's "Require terms and conditions acceptance" option so a buyer must affirmatively accept the seller terms before purchase.

DOCUMENT D - WHOP RETURN / WITHDRAWAL POLICY (UPLOAD-READY EXTRACT)

Zenaian does not ordinarily provide discretionary prorated refunds or credits for unused subscription time or unused question allowance. This policy does not limit any non-waivable consumer right, valid statutory withdrawal right, payment-network remedy, or refund required by law.

For Korean consumers, the E-Commerce Act generally provides a withdrawal period under Article 17, subject to statutory exceptions. If Zenaian relies on the exception for a service or digital content whose provision has begun, that limitation applies only where the legally required disclosure and other statutory measures have been provided. For divisible services/content, a statutory right may remain for an unprovided portion. If the service differs from what was advertised or agreed, the separate statutory non-conformity withdrawal period applies. Where a valid withdrawal applies, Zenaian will refund within the period required by Article 18, including the three-business-day rule where applicable.

To request a withdrawal/refund, contact [SUPPORT EMAIL] or privacy@zenaian.com and provide the email used for the purchase and sufficient transaction information to identify it. Do not send full card details. Account deletion is processed separately and does not waive a valid withdrawal/refund right.

Pre-publication checklist

- Replace [LEGAL OPERATOR NAME], address, business registration/e-commerce registration, CPO/privacy-responsible person and support email placeholders.
- Keep Hosting.kr visitor-statistics packages and raw-log archiving disabled by default. Exact AWS region is optional verification, not a publication blocker on current evidence; revise the transfer classification if later evidence contradicts the domestic-hosting assumption.
- Complete Google Workspace setup to the approved standard; replace planned wording with actual configuration.
- Implement removal of all Zenaian user-identifying custom metadata from new Whop checkout creation and verify checkout_configuration_id mapping before publishing the minimization statement.
- Implement xAI ZDR header fail-closed check and AI-generated result marking.
- Upload Website Terms, Privacy Policy and Return Policy / Additional Terms to Whop and enable required acceptance.
- Have Korean counsel review the final Korean E-Commerce Act digital-content/service withdrawal implementation and the exact checkout disclosure shown before payment.
- Perform a final PIPA/E-Commerce/AI Basic Act check using law in force on launch date.
